Career Objective

To start my career as a Full Stack Developer where I can apply my knowledge of frontend and backend technologies to build efficient web applications and grow with the organization.

Skills

- Frontend: HTML, CSS, JavaScript, React, Bootstrap
- Backend: Python, Django, REST API
- Database: MySQL, SQL
- Tools: Git, GitHub, VS Code.

Projects

- Student Attendance Management System (Django + SQL)
 - Built a web-based system to manage student attendance records.
 - Implemented authentication and role-based access.
 - Used Django ORM with MySQL database.
- Todo App (React + Django REST)
 - Developed a full-stack Todo application with user authentication.
 - Implemented CRUD operations using Django REST Framework.
 - Frontend built with React for dynamic UI.
- Netflix Clone (Frontend Project)
 - Built a responsive Netflix clone using HTML, CSS, and JavaScript.
 - Integrated movie trailer section with YouTube API.
- Amazon Clone (Frontend Project)
 - Created an e-commerce frontend layout with product listing and cart system.
 - Focused on responsive UI with CSS Flexbox/Grid.

- Social Media Website
 - Developed a basic social media frontend with login, posts, and profile sections.
